

BUILDING THE RIVER CAPITAL

Three Capital projects will transform Saint Paul's riverfront into centers of river-oriented activity accessible to all.

RIVER LEARNING CENTER/NATIONAL PARK SERVICE MNRRA HEADQUARTERS

The gateway to the Mississippi River, welcoming residents and visitors to this national feature with four-season programming that promotes stewardship and teaches the culture, history, and ecology of the river.

RIVER BALCONY

A 1.5-mile promenade that extends along Downtown Saint Paul's signature Mississippi River Bluff and down to the river. The Balcony transforms urban infrastructure into public space that connects parks, civic landmarks and private development the length of Kellogg Boulevard.

EAST SIDE RIVER DISTRICT

A complex, dynamic 1,000-acre riparian landscape that knits together historically incompatible uses such as industry, infrastructure, wildlife, and culture to create an educational and experiential landscape focused on restoration, conservation, and resilience.
